

## Replacement of former series (discontinue models)

---

### \* SHARP Ultrasonic Cleaning Devices

---

#### \* Maintenance service term

We provide our customers with **7 year maintenance service effective after product's production stoppage.**

However, some of the accessory makers have discontinued the production of the key components of the device.

We take great effort in reserving components for replacement in order to provide our customers with the best maintenance service possible.

However, please be aware that **we occasionally face difficulty in carrying out maintenance, even while your service term is still in effect.**

We would also be happy to extend our maintenance service program for our customers beyond the 7 year service period after product's production stoppage, provided the appropriate components are available.

#### \* About replacement

The following are **examples.**

Several options are available depending on how conventional Ultrasonic Cleaning Devices are set up (system configuration, required space etc.).

For more details, please consult with **our customer support center** near you.
